NameBridge: independent labelling

Thank you for helping. This takes about 10 minutes and checks my work against a second pair of eyes.

What to do: for each pair on the 'Pairs' sheet, look at the two records and pick an answer in the 'Your answer' column:

Same person - the information shown makes it likely these are one person
Different people - the information shown makes it likely these are two people
Cannot tell - the information shown is not enough to decide either way

Rules:

1. Use only what is on the sheet. Please do not look at the project, the app or its repository first.
2. Spellings that look alike are NOT proof on their own. Arabic names have many valid spellings, and different people can share the same name.
3. Matching emails or student IDs are evidence; conflicting ones are evidence the other way. '(not recorded)' means the field was empty, so it tells you nothing either way.
4. If you are unsure, 'Cannot tell' is a perfectly good answer. Do not guess to be helpful.
5. A comment is optional but useful when you were torn.

All names and details are invented. Save the file and send it back. Thank you!

Pair	Record A (name, email, student ID, organization)	Record B	Your answer	Comment
P01	**Rana Fathy** rana@example.test S9001 (not recorded)	**Rana Fathi** rana@example.test S9002 (not recorded)	☐ Same person ☐ Different people ☐ Cannot tell	
P02	**Ahmed Hasan** (not recorded) S3001 Alex Univ	**Ahmed Hassan** a.hassan@example.test S3001 Alex Univ	☐ Same person ☐ Different people ☐ Cannot tell
